SUMMARY

Tech Lead with 5 years of experience building **production-grade backend and AI-driven systems**. Currently leading **Voicebot and integration platforms** at Convin, working across **LLMs, STT/TTS pipelines, distributed systems, and cloud infrastructure**. Strong ownership mindset with deep exposure to **system design, scalability, cost optimization, and customer-facing engineering**.

SKILLS

Languages	Python (Django, Flask, FastAPI), Go, C++
Conversational AI	LLM-based systems, Speech-To-Text, Text-To-Speech, Agentic Workflows
AI Techniques	RAG, MCP, Prompt Engineering, Real-time AI Pipelines
Backend & Messaging	Async Programming, REST APIs, Webhooks, RabbitMQ, Kafka
Databases & Search	PostgreSQL, MongoDB, DynamoDB, Redis, ElasticSearch
Cloud & Infra	AWS, Oracle Cloud (OCI), GCP, Azure, Docker, Kubernetes, Linux, On-Prem
Observability	Grafana, Prometheus, Loki, Jaeger, Splunk

EXPERIENCE

Convin.AI — Bengaluru Dec 2023 – Present

Tech Lead – Voicebot Dec 2024 – Present

- Architected and launched a **real-time AI Voicebot platform**.
- Achieved **sub-second round-trip latency** across conversational flows in production.
- Scaled the platform to **300K+ automated calls/day** across multi-tenant enterprise deployments.
- Implemented strong **observability, metrics, and failure attribution**, reducing debugging and RCA effort by **70%+**.
- Led cost-efficiency initiatives, delivering **45% reduction in TTS/LLM costs** without degrading call quality.
- Built internal systems for faster tenant onboarding, reducing manual setup time by **80%**.
- Implemented **RAG-based live knowledge base access** for contextual, real-time responses during calls.
- Delivered secure cloud and **on-prem deployments** for high-security enterprise customers.
- Mentored engineers and drove technical execution, priorities, and cross-team alignment.

Tech Lead – Client Onboarding & Integrations Dec 2023 – Dec 2024

- Led a team of 4 engineers owning **client onboarding and integration platforms**, including microservices for **call ingestion, metadata retrieval, and schema normalization** - ETL Pipeline.
- Drove migration from **AWS (Lambda, S3)** to **Oracle Cloud Infrastructure K8**, achieving **50% cost savings**.
- Enabled DIY integrations via **APIs, webhooks, SFTP, batch pipelines, VPN-auth, and on-prem setups**.
- Improved system robustness using **monitoring, alerts, recovery workflows**, and scalable storage abstractions.
- Owned **pre-sales technical discussions**, designing integration architectures tailored to diverse client ecosystems.

Amadeus Labs — Bengaluru Jan 2021 – Dec 2023

Software Development Engineer – I Aug 2021 – Dec 2023

- Built a **functional monitoring framework** adopted by 25+ services, logging high-volume events to Splunk.
- Technical owner of a framework detecting and resolving **seat discrepancies across distributed systems**.
- Resolved critical production outages impacting **30+ enterprise customers** via NoSQL DB optimization.
- Automated feature rollout and configuration for **80+ customers**, reducing manual effort by **68%**.

Software Development Engineer – Intern Jan 2021 – May 2021

- Built an end-to-end testing framework enabling experts to define dimensions and generate large test datasets.
- Developed FastAPI-based backend with Angular UI and MySQL storage.

EDUCATION

B.E. in Electronics & Computer, Thapar Institute of Engineering & Technology, Patiala 2017-2021
CGPA: 9.20

SDRR Public School, Shamli (Affiliated to CBSE)

Senior School Certificate (Class 12th)	89.8%	2017
Secondary School Certificate (Class 10th)	10 CGPA	2015

PORTFOLIO

yashmittal.co.in — Detailed projects, AI systems, integrations, and technical write-ups.
